Shoreline Clean-up

Each year, LICA—*Environmental Stewards* hosts a shoreline cleanup within the Beaver River watershed as part of the Great Canadian shoreline cleanup.

Staff, community volunteers, and students from Notre Dame High School volunteered their time to help remove garbage from the shoreline of Jessie Lake. They were able to make a noticeable difference in the health and beauty of our aquatic ecosystem. LICA would like to thank all of our volunteers for joining us in this initiative!

Through this annual clean-up over 700 kg of litter has been removed from Jessie Lake's shoreline.

Keep a look out for our next Jessie Lake clean-up in the fall.
