

Stream of Dreams

Stream of Dreams is committed to helping communities discover their local watershed, become stewards for salmon and all aquatic creatures. We believe in the integrity of our science to art process and embrace optimism to create lasting meaningful results. Our murals represent hope for a future with healthy watersheds.

LICA—Environmental Stewards is the host organization for Stream of Dreams in our region. The LICA interacts with every single student at your school to teach them the importance of water and to help paint a beautiful Dream Fish to be placed on your school fence. Stream of Dreams is an eco-education program focusing on water, watersheds, and streams, creating a lasting community art legacy to beautify and inspire the whole community.

If your school is interested in having Stream of Dreams at your school please fill out our application form on our website
