

Shoreline Cleanup

Each year, LICA—Environmental Stewards hosts a shoreline clean-up within the Beaver River watershed as part of the Great Canadian Shoreline Clean-up.

Staff, community volunteers, and students from Notre Dame High School volunteered their time to help remove garbage from the shoreline of Jessie Lake. They were able to make a noticeable difference in the health and beauty of our aquatic ecosystem. LICA would like to thank all of our volunteers for joining us in this initiative!

If you would like to host a shoreline clean-up with your school or organization please contact outreach@lica.ca
