- 12:45 pm Break-out session discussion (see discussion guide on reverse)
- 2:00 pm Break-out session group reports
- 2:30 pm Final question/answer
- 2:50 pm Summary and next steps
- 3:00 pm** **ADJOURN**

AFTERNOON DISCUSSION GUIDE

For each watershed value (water quantity, water quality, riparian areas and wetlands, biodiversity, land management, climate change, and knowledge and understanding), consider the following questions. Refer to the Key Contents Summary Document for details pertaining to each question.

Q1. Are the main concerns represented?

Q2. Goals and objectives- Are all goals and objects reflected at this time? Can you suggest additions?

Q3. Are the indicators and measures suitable? (Is there consensus at the table?) If not, suggest additional or more suitable indicators.

Q4. Are targets and thresholds appropriate? If not, indicate why and suggest additional targets and thresholds.

Q5. What key recommendations would you make to achieve goals? (Try to think of 2-3 key recommendations per value)

Q6. Groups to consider knowledge and understanding in each section – what messages need to be developed/shared?
