

# Fisheries Workshop

LICA Environmental Stewards and School of Fish present an opportunity to learn more about our local fisheries!

This fisheries workshop will provide both an in-class and outdoor experience. On Saturday, preserved fish and photos will be used to teach participants, at the LICA office, key morphological features to help identify fishes. On Sunday, a field day will solidify the identification techniques learnt by giving participants the opportunity to handle live fish while discussing appropriate fish habitats.

**This two-day workshop will be held on:**

**Saturday, September 16th, 2023**

**1 - 4:30 pm, at the LICA office**

**Sunday, September 17th, 2023**

**9 am – 3 pm at Moose Lake Bonnyville Beach**

**Please contact LICA to register!**

**Email: [watershed@lica.ca](mailto:watershed@lica.ca)**

**Phone: 780-812-2182**
