

Air Pollution

We have lots of problems here on Earth. The most important one to me is that everybody is polluting the air. It needs to change because sooner or later the air will be so full of bad things we won't be able to breathe. One idea I have is to ride your bike or walk if you can. My other idea is to ride the bus so we are not polluting the air as much. Try these things so we can begin to stop air pollution!

Riding a bike would be a good idea for a couple reasons. To get people to start riding bikes we could start to make more biking programs. Bikes do not use fuel so it will not pollute the air. If you are not in the car you will have more time to spend with your family and so everybody would be happier. Air pollution causes 24 million deaths each year, so that is one death every 13 seconds. (Theworldcounts.com) We need to change something, and fast.

Another idea that you already heard in my first paragraph is to ride the bus if it is too far to bike or walk. This way we will still be able to go far places but we will burn less gas and we could interact more. Cold Lake has a bus system but Bonnyville does not and I think they should definitely get one. Studies show that you are far safer in a bus than in a car. You will also save money on gas, oil changes and maintenance. If everybody does these things I definitely think the air we breathe would change for the better.

I think that if people planted trees in their backyards then the air would be cleaner. Trees are able to absorb bad things out of our air so if we didn't have any then we definitely could not breathe. They reduce the amount of greenhouse gases in the air and that will make the air cleaner. Trees in our environment will help the air so much. I suggest you try these ideas some time.

From a Catholics point of view, the environment is very important. In Genesis 2:15 it was written, "The Lord God took the man and put him in the garden of Eden to work it and keep it." God made the Earth and we don't want to ruin it. Keeping the environment safe is not just important to Catholics though, it is important to everyone! Respect the environment and the people in it! Stop air pollution!
